Pupils and Parents

The LORD is my shepherd, I lack nothing. He makes me lie down in green pastures, he leads me beside quiet waters, he refreshes my soul. He guides me along the right paths for his name's sake. Even though I walk through the darkest valley, I will fear no evil, for you are with me; your rod and your staff, they comfort me.

APPENDICES

Biometric data

Biometric data means personal information about an individual's physical or behavioural characteristics that can be used to identify that person; this can include their fingerprints, facial shape, retina and iris patterns, and hand measurements.

'Processing' of biometric information includes obtaining, recording or holding the data or carrying out any operation or set of operations on the data including (but not limited to) disclosing it, deleting it, organising it or altering it. An automated biometric recognition system processes data when:

- recording pupils' biometric data, for example, taking measurements from a fingerprint via a fingerprint scanner;
- storing pupils' biometric information on a database system; or
- using that data as part of an electronic process, for example, by comparing it with biometric information stored on a database in order to identify or recognise pupils.

As long as the child or a parent does not object, the written consent of only one parent will be required for a school or college to process the child's biometric information. A child does not have to object in writing but a parent's objection must be written. You can withdraw your consent at any time in writing.
